

INSTRUCTIONS FOR Pro FLAG™

Box Includes: (1) ProFlag™ Composite Pole, (1) ProFlag™ Fabric Flag and (1) Professional ProFlag™ Carry Bag
Also includes one of the following accessories: (1) Deluxe Folding Base Stand or (1) Deluxe Ground Stake

*The number of sections may vary.

FLAG POLE / DELUXE FOLDING BASE - DELUXE GROUND STAKE ASSEMBLY

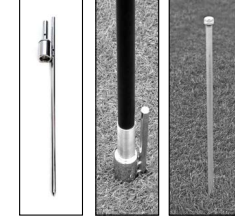

Ground Base Open and set Deluxe Folding Base on ground at desired location. Insert flag pole into Deluxe Folding Base stand.

Note: 21' pole base stand uses included adapter.

Stake Hammer stake into ground. Insert the flag pole into Deluxe Ground Stake.

Note: 21' pole - ground stake, cap provided for driving stake into ground. Remove cap prior to installing flag pole.

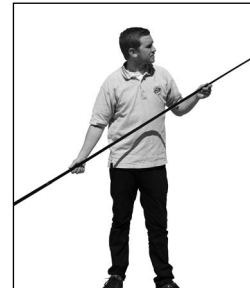

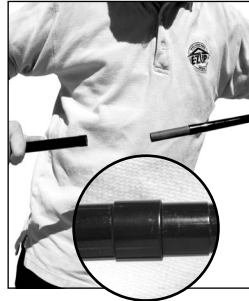

POLE ASSEMBLY

Step 1. Remove all pole segments from the carry bag.

Step 2. Build the flag pole by starting with the base pole (see Pole Identification Chart). Add pole segments by counting down in numerical order. Insert solid, smaller diameter segments into one another.

Example: To build the Large (L) pole, start with base pole 4B and insert 3P, 2P, and lastly 1P.

Step 3. Verify that all sections are completely inserted to ensure a proper flag fit.

POLE IDENTIFICATION CHART

# Of Sections	Pole Size	Base Pole:	Use with Poles:
2 Sections	XS	2B X	1P
2 Sections	S	2B S	1P
3 Sections	M	3B	2P - 1P
4 Sections	L	4B	3P - 2P - 1P
5 Sections	XL	5B	4P - 3P - 2P - 1P
6 Sections	XXL	6B	5P - 4P - 3P - 2P - 1P

FLAG AND POLE ASSEMBLY

Step 1. Insert top of the pole into the bottom of the flag fabric pocket.

Step 2. Work flag fabric down until end of pole completely reaches end of the flag fabric pole pocket. This will ensure best and proper flag fit on pole.

Note: Working the fabric down slowly makes it easier to slip flag fabric completely through.

Step 3. Grasp with one hand the bottom portion of the flag fabric with the pole (to achieve the curvature of the flag design). Use the other hand to attach the hook on the flag fabric cord to the eyelet on the pole.

Step 4. Adjust strap to the desired tension. Do not overtighten the strap.

Warning: Do not set up within 30 feet of power lines.
 Do not use during electrical storms or high winds.
