

# INSTRUCTIONS FOR *Encore*™

**PARTS INCLUDED:** (1) Assembled Shelter Frame, (1) Fabric Top, (1) Roller Bag, (4) Spikes

Please review the following instructions and make yourself familiar with the parts and function of your E-Z UP® Instant Shelter®

## SET-UP

**Step 1:** Place the shelter frame in the center of the setup area. With a partner on the opposite side of the frame, hold the two outer legs and lift slightly for ground clearance. Take a few steps back and extend the frame to full arm's length, approximately for feet.

**Step 2:** With a partner, hold the top and bottom of the truss where it forms a diamond. Lift slightly and slowly walk backward until the frame is fully extended. Take care to avoid pinching your hands and fingers.

**Step 3:** At each corner, place one hand on the top corner. While pushing down on the corner, lift the slider with your other hand until it locks into position.

**Step 4:** Place the fabric over the top of the frame. Use the hook and loop straps to secure each corner of the cover to the upper portion of each leg.

**Step 5:** The adjustable legs offer multiple height positions. Tilt one side of the shelter upward and extend a lower leg section until it clicks into place. Repeat on the adjacent leg until all legs are extended to a desired height. When extending the legs, have a partner hold the frame stable and avoid having only two diagonal legs extended.

## TAKE-DOWN

**Step 1:** Press the lock button and lower each leg completely.

**Step 2:** At each corner, release the Auto-Slider® Pull Pin and pull the slider down slowly. Be careful to not pinch your fingers and hands. Please make sure that all Auto-Slider Pull Pins are disengaged prior to attempting to collapse the frame. Closing the frame with any sliders in a locked position will cause damage and/or breakage.

**Step 3:** Hold the top of the center frame section and lift slightly, then slowly walk toward your partner as the frame holds securely. Keep walking until the frame is about half-way closed. Be sure to avoid pinching your hands or fingers. Hold outside legs and continue closing shelter as you walk towards your partner. The completely folded shelter should stand up on its own.

**Step 4:** With the closed shelter standing, slide the roller bag over the shelter with the zippered end at the bottom. Turn the shelter over gently and zipper shut.

**Note:** The shelter top may remain in place for easier subsequent setups.
